TECHNICAL SKILLS

Languages:	C++, Java, JavaScript, TypeScript, Python, SQL, C
Web and Backend:	React.js, Next.js, Node.js, Express.js, RESTful APIs, HTML5, CSS3, Tailwind CSS
Databases:	PostgreSQL, PostGIS, MongoDB, MySQL, relational database design
Security and Tools:	JWT, bcrypt, RBAC, Git, GitHub, Docker, Postman, Supabase, Vercel
Core CS:	Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Soft Skills:	Technical Communication, Problem Solving, Team Collaboration, Leadership

PROJECTS

BhuMap3D - 3D Cadastral and Vertical Property Mapping System | [Live](#) Aug 2026 - Sep 2026

- Engineered and deployed a full-stack geospatial land-record platform to map parcels, buildings, floors, apartments, and underground infrastructure.
- Designed a normalized PostgreSQL/PostGIS data model and hierarchical 14-digit ULPIN/VPID workflow linking vertical properties to parent land parcels.
- Implemented RESTful APIs, ULPIN/VPID search, spatial containment validation, floor-wise navigation, interactive GIS visualization, and Dockerized local development.

Technologies: Next.js, TypeScript, PostgreSQL, PostGIS, Supabase, Vercel, Docker, MapLibre, React Leaflet

ArtVerse - Online Virtual Exhibition Platform | [Live](#) Apr 2026

- Developed a full-stack exhibition platform with role-based workflows for visitors, creators, and administrators.
- Implemented secure authentication and authorization using JWT and bcrypt, protected REST API routes, and role-based access control (RBAC).
- Built CRUD workflows for exhibit submission, moderation, approval tracking, gallery search and filtering, user management, likes, and comments.

Technologies: JavaScript, Node.js, Express.js, MongoDB, REST APIs, JWT, bcrypt, HTML5, CSS3

MemSim - Dynamic Memory Management Visualizer | [Live](#) Mar 2026

- Built a browser-based operating-system simulator for Paging, Segmentation, Virtual Memory, and configurable memory allocation.
- Implemented FIFO, LRU, Optimal, and Clock page-replacement algorithms with step-by-step execution, page-fault tracking, and comparative analysis.
- Visualized physical frames, page tables, TLB operations, and virtual-to-physical address translation using animated interfaces and Canvas charts.

Technologies: JavaScript, HTML5, CSS3, Canvas API, Operating Systems, Algorithms

TRAINING

AI Prescription Explainer - UI UX Design Project | [GitHub](#) | [Certificate](#) Jun 2026 - Jul 2026

- Learned the UI/UX design process, including user research, personas, user flows, wireframing, prototyping, and usability testing.
- Designed a high-fidelity mobile prototype in for medicine information and medication reminders using user-centered design principles.
- Conducted user research and translated findings into personas, empathy maps, user journeys, wireframes, and an interactive prototype.

Technologies: Figma, User Research, Wireframing, Prototyping, Usability Testing

ACHIEVEMENTS

- Shortlisted** out of 1,000+ competing teams during the internal college screening rounds for **(SIH) 2026** Sep 2026
- Earned O grades in Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, and Computer Networks.

CERTIFICATIONS

- AI Database Certified Foundations Associate | Oracle - [Certificate](#) Sep 2026
- Agentic AI Certified Foundations Associate | Oracle - [Certificate](#) Sep 2026

EDUCATION

Lovely Professional University B.Tech in Computer Science and Engineering - CGPA: 8.43/10	Phagwara, Punjab Aug 2024 - Present
MGM Public School Senior Secondary Class XII - 72.4	Ludhiana, Punjab 2023 - 2024
Army Public School Class X - 86.0	Jalandhar, Punjab 2021 - 2022
